

School of Computer Science & Engineering  
COMP1531 – Software Engineering Fundamentals

# **GROUP PROJECT A\_FOR\_ABSENT**

## **FINAL REPORT**

Lixing Tang (z5224314)

Fanrui Li (z5191527)

Vien Dat Huynh (z5223470)

## Table of Contents

Final User Stories .....	3
Class Diagram .....	7
Entity-Relationship Design.....	8
Log Book .....	9
1. Progress of Tasks .....	9
2. Responsibility Allocation.....	10
3. Group Meetings.....	10

## FINAL USER STORIES

- Priority of each user story is measured in one of 3 values (high, medium and low).
- Each story point refers to ½ day (1SP = ½ day).

### Initial Epic story:

1. As a customer, I should be able to create order, check order and make payment.

<b>ID</b>	US1
<b>Name</b>	View menu options
<b>User-story Description:</b> As a customer, I should be able to view the menu so that I can know available types of base burgers and main ingredients. <b>Acceptance Criteria:</b> <ul style="list-style-type: none"><li>• Base and custom burger options should be displayed.</li><li>• Base burgers and wraps should be displayed with all ingredients and price.</li><li>• Menu for customs should be displayed with all available ingredients.</li><li>• Ingredients should be displayed with name, price and calories.</li></ul>	
<b>Priority</b>	High
<b>Story points</b>	2SP

<b>ID</b>	US2
<b>Name</b>	Order base
<b>User-story Description:</b> As a customer, I should be able to choose a standard base burger or wrap so that I can save my time. <b>Acceptance Criteria:</b> <ul style="list-style-type: none"><li>• Should be able to choose a standard base burger or wrap.</li><li>• Should be able to see a net price for the order.</li><li>• Should be able to proceed to check out page.</li><li>• Should be able to add more burgers, sides or drinks to the order.</li></ul>	
<b>Priority</b>	High
<b>Story points</b>	4SP

<b>ID</b>	US3
<b>Name</b>	Order custom
<b>User-story Description:</b> As a customer, I should be able to choose ingredients (buns, sandwiches, patties, sauce, etc.) so that I can enjoy the food. <b>Acceptance Criteria:</b> <ul style="list-style-type: none"><li>• Should be able to choose between burger and wrap.</li><li>• Should be able to choose quantity of buns from a given range (2 to 4).</li><li>• Should be able to choose type of patties.</li><li>• Should be able to choose the quantity of patties from a given range based on the number of buns (single: 1 or 2, double: 2 to 4, triple: 3 to 6).</li></ul>	

<ul style="list-style-type: none"> <li>Should be able to choose quantities of other ingredients (tomato, lettuce, tomato sauce, cheddar cheese, swiss cheese, etc.).</li> <li>Should receive alert if the order quantity exceeds the stock limit. (e.g. customer ordered 2 chicken patties but only 1 is left in stock).</li> <li>Should be able to see a net price for the order.</li> <li>Should be able to proceed to check out page.</li> <li>Should be able to add more burgers, sides or drinks to the order.</li> </ul>	
<b>Priority</b>	High
<b>Story points</b>	6SP

<b>ID</b>	US4
<b>Name</b>	Order sides and drinks
<p><b>User-story Description:</b> As a customer, I should be able to add sides and drinks to my order so that I can have more satisfactions.</p> <p><b>Acceptance Criteria:</b></p> <ul style="list-style-type: none"> <li>Should be able to choose sides (nuggets, chips, salad, etc).</li> <li>Should be able to choose drinks (Coke, Sprite, Fanta, water, orange juice).</li> <li>Drinks are displayed with different sizes (contained drink: Can or Bottle; juice: Small or Medium).</li> <li>Should receive alert if the order exceeds the stock limit. (e.g. a customer ordered 2 cans of coke but only 1 is left in stock).</li> <li>Should be able to see a net price for the order.</li> <li>Should be able to proceed to check out page.</li> <li>Should be able to add more burgers, sides or drinks to the order.</li> </ul>	
<b>Priority</b>	High
<b>Story points</b>	4SP

<b>ID</b>	US5
<b>Name</b>	Make payment
<p><b>User-story Description:</b> As a customer, I should be able to check out so that I do not have to queue at cashier.</p> <p><b>Acceptance Criteria:</b></p> <ul style="list-style-type: none"> <li>Should be able to see the total price for the order.</li> <li>Should be able to modify the order.</li> <li>Customer should be given an order ID after checkout.</li> </ul>	
<b>Priority</b>	Low
<b>Story points</b>	1SP

<b>ID</b>	US6
<b>Name</b>	Check order status
<p><b>User-story Description:</b> As a customer, I should be able to check my order status so that I can know when to collect my food.</p>	

<b>Acceptance Criteria:</b> <ul style="list-style-type: none"> <li>Customers should be able to enter their order ID.</li> <li>Different order status should be displayed when valid order IDs are entered ('Queueing', 'Preparing', 'Ready to collect' or 'Collected').</li> </ul>	
<b>Priority</b>	Medium
<b>Story points</b>	2SP

2. As a staff, I should be able to view current orders, update order status and maintain inventory.

<b>ID</b>	US7
<b>Name</b>	View current orders
<b>User-story Description:</b> As a staff, I should be able to view current orders so that I can reply to customer enquiries about order status. <b>Acceptance Criteria:</b> <ul style="list-style-type: none"> <li>Order information of all current orders should be displayed with information of order ID, food details and ordered time.</li> <li>Orders should be displayed with their status ('Queueing', 'Preparing', 'Ready to collect' or 'Collected').</li> </ul>	
<b>Priority</b>	High
<b>Story points</b>	3SP

<b>ID</b>	US8
<b>Name</b>	Update order status
<b>User-story Description:</b> As a staff, I should be able to update an order status so that the customer knows her order is ready for pick-up. <b>Acceptance Criteria:</b> <ul style="list-style-type: none"> <li>Status will be set to "Queueing" once the order is placed.</li> <li>Staff should be able to change status to "Preparing" when the food is being prepared in the kitchen.</li> <li>Staff should be able to change it to "Ready to collect" once the order is ready.</li> <li>Staff should be able to change it to "Collected" after the order is collected.</li> <li>Collected orders should disappear from staff's current order page.</li> </ul>	
<b>Priority</b>	High
<b>Story points</b>	2SP

<b>ID</b>	US9
<b>Name</b>	Check inventory stocks
<b>User-story Description:</b> As a staff, I should be able to check the stock of all ingredients so that I can refill the out-stock ones in time.	

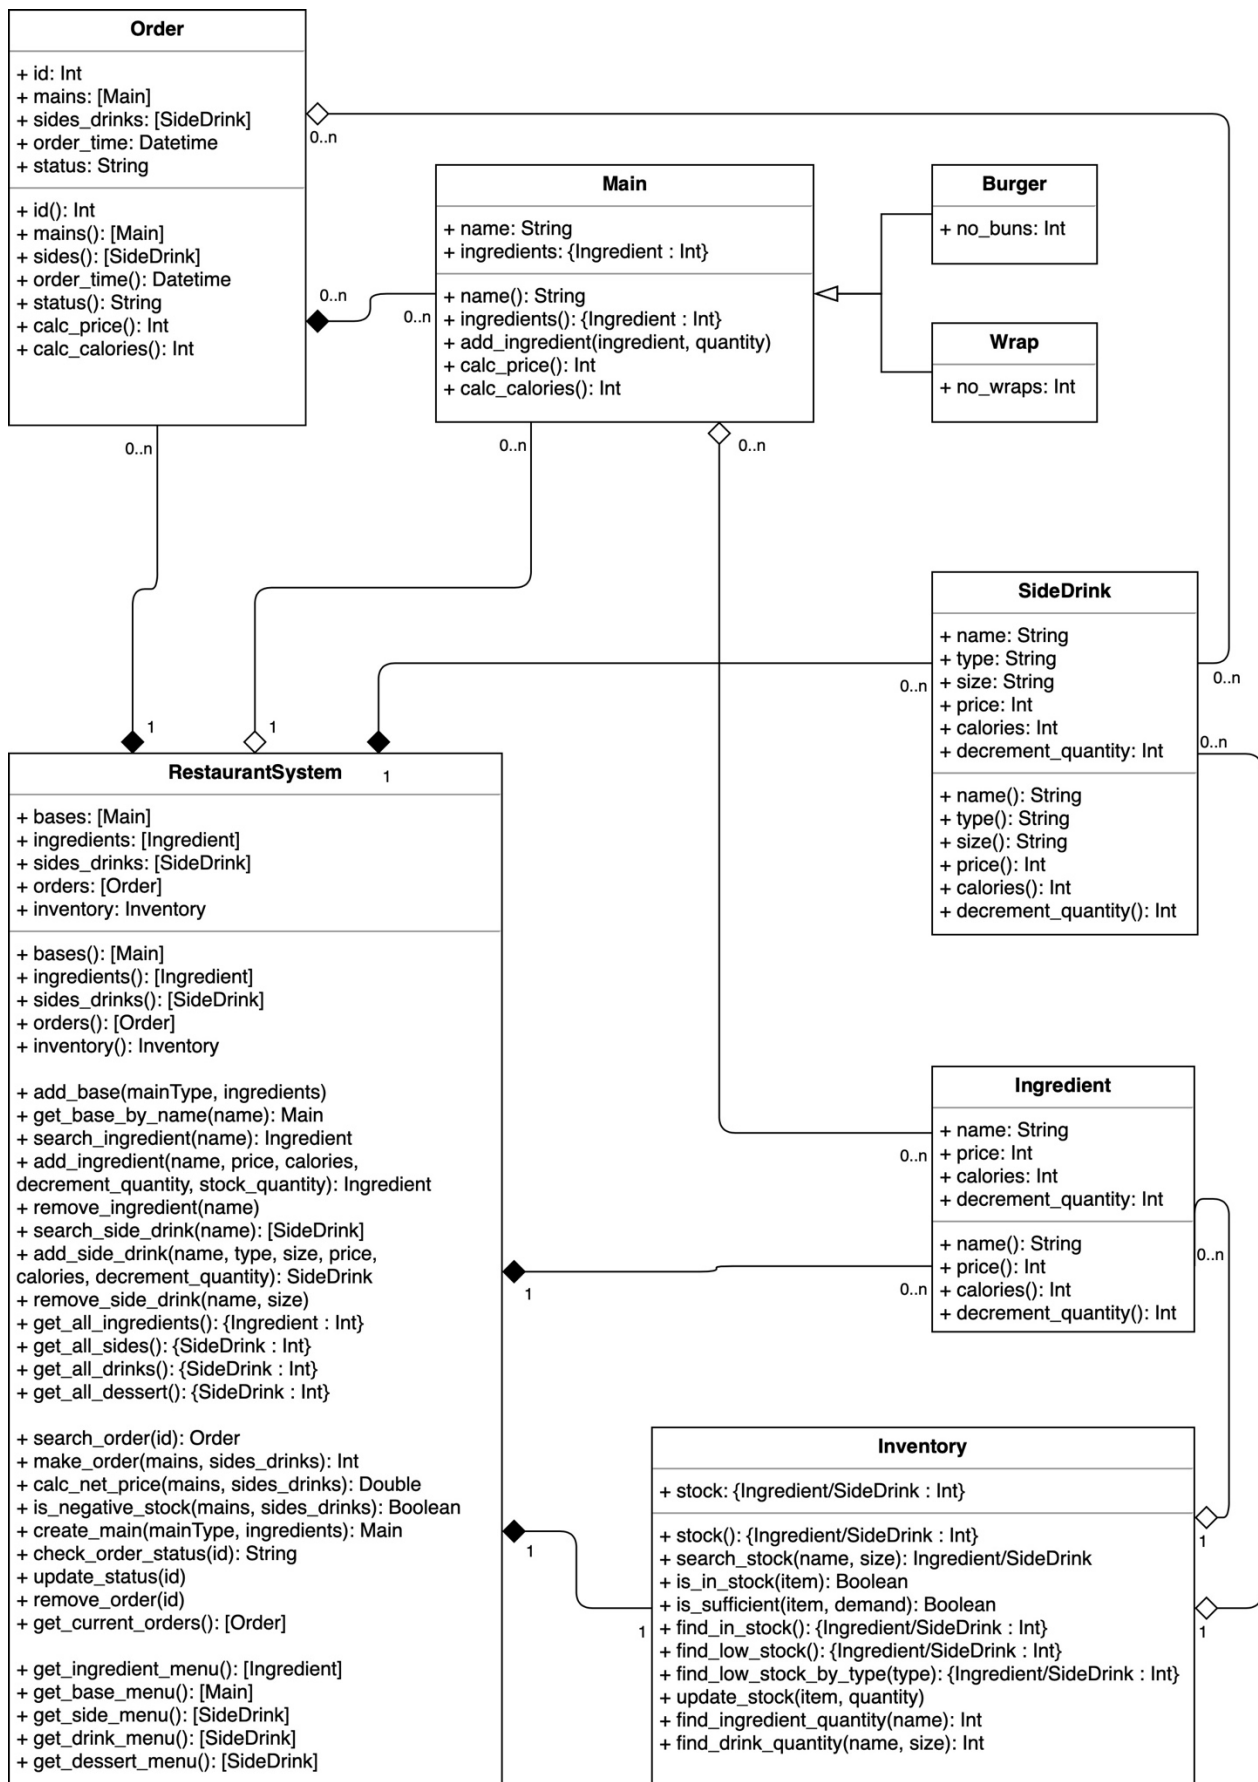

<b>Acceptance Criteria:</b> <ul style="list-style-type: none"> <li>• Staff should be able to check the quantity of all ingredients in stock.</li> <li>• Staff should be able to check all the ingredients that are low-stock.</li> </ul>	
<b>Priority</b>	Medium
<b>Story points</b>	4SP

<b>ID</b>	US10
<b>Name</b>	Update inventory stocks
<b>User-story Description:</b> As a staff, I should be able to update the quantities of ingredients so that they are available for customers to select. <b>Acceptance Criteria:</b> <ul style="list-style-type: none"> <li>• Staff should be able to increase the quantity of an ingredient in stock.</li> <li>• The quantity of an ingredient in stock should reduce correlatively when an order is made.</li> </ul>	
<b>Priority</b>	Medium
<b>Story points</b>	6SP

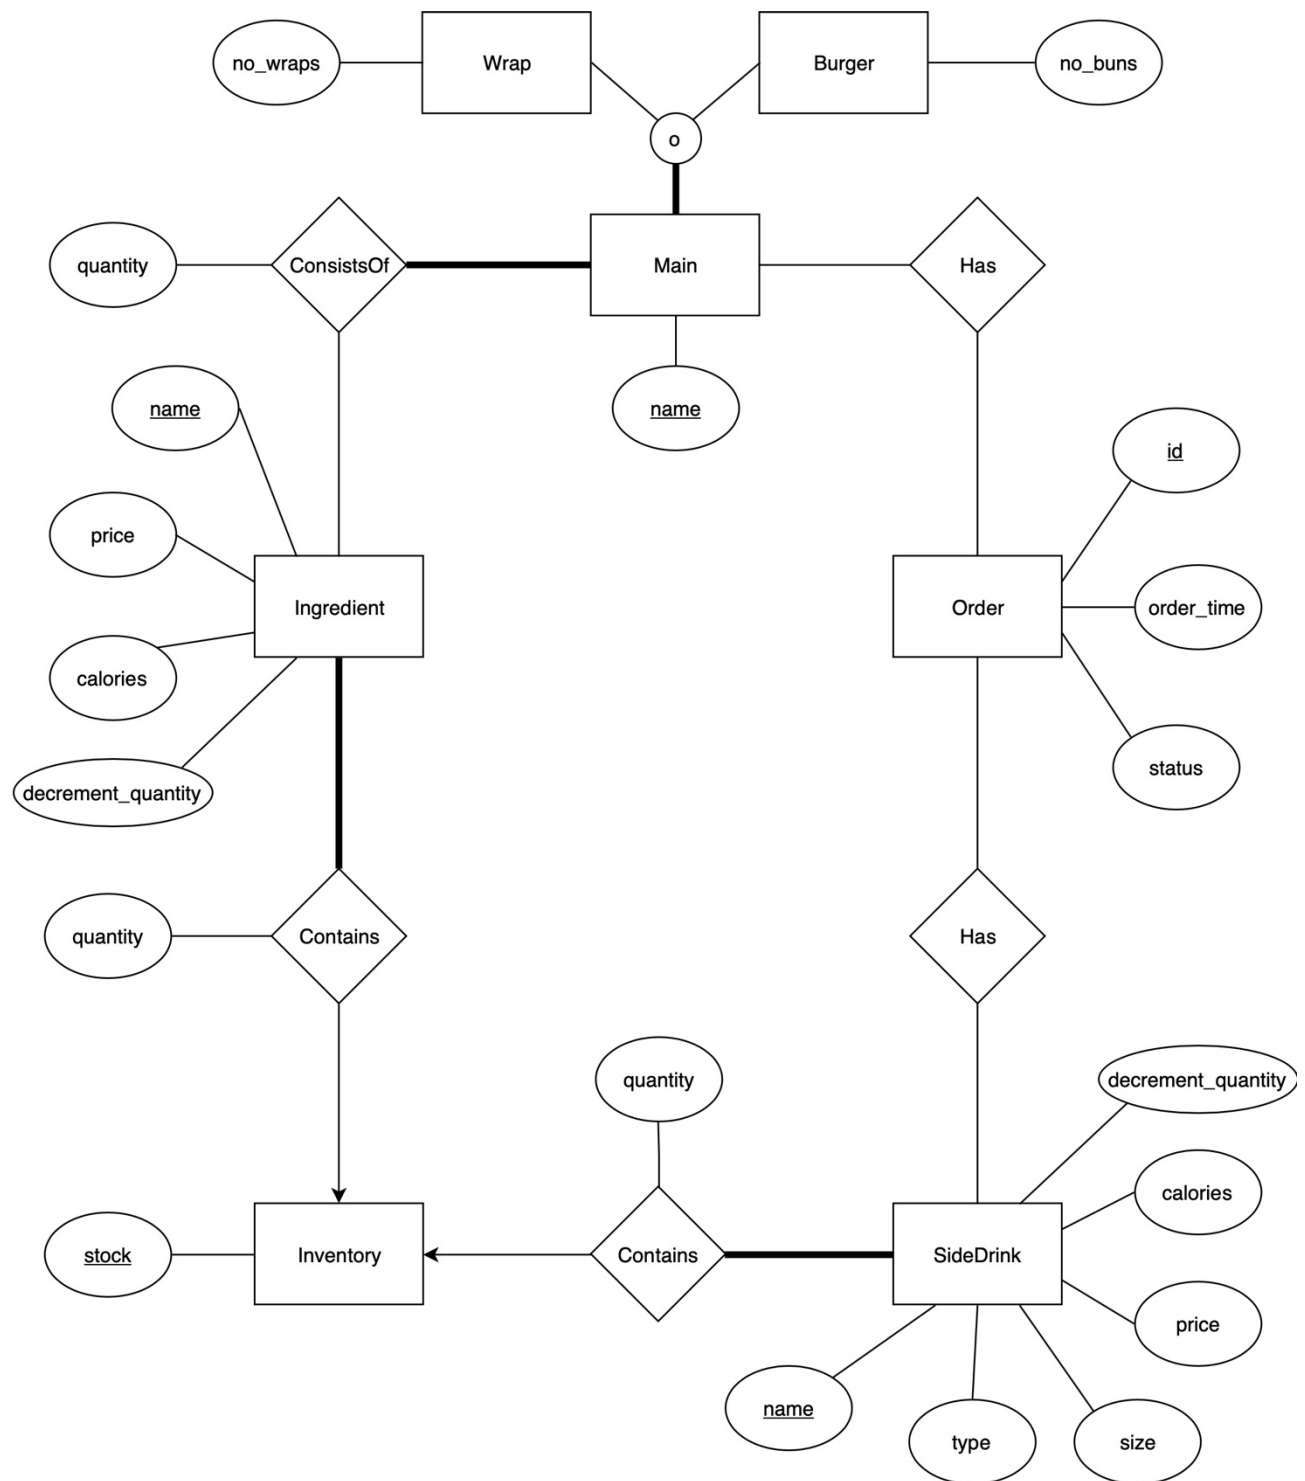

<b>ID</b>	US11
<b>Name</b>	Create new ingredients
<b>User-story Description:</b> As a staff, I should be able to create new ingredient options (ingredient name, price, calories and quantity) so that new ingredients are available for customers to select. <b>Acceptance Criteria:</b> <ul style="list-style-type: none"> <li>• Staff should be able to add a new ingredient to stock with the information of name, price, calories and quantity.</li> <li>• This ingredient then should be visible in customer's menu and staff's stock list.</li> </ul>	
<b>Priority</b>	High
<b>Story points</b>	3SP

<b>ID</b>	US12
<b>Name</b>	Delete existing ingredients
<b>User-story Description:</b> As a staff, I should be able to delete an existing ingredient if it is no longer served so the customer cannot choose it. <b>Acceptance Criteria:</b> <ul style="list-style-type: none"> <li>• Staff should be able to delete all the data of an ingredient from the stock.</li> <li>• This ingredient then should not be in customer's menu or staff's stock list.</li> </ul>	
<b>Priority</b>	Medium
<b>Story points</b>	3SP

## UML CLASS DIAGRAM

## ENTITY-RELATIONSHIP DESIGN

### Assumption:

- A customer does not have to purchase both mains and sides – drinks in her order.
- A main is either a burger or a wrap.
- A main must consist of several ingredients.
- There are some base standard mains already in the menu but they may or may not be ordered.
- Customers can only choose ingredients, sides and drinks if they are contained in the inventory.

## LOG BOOK

### 1. PROGRESS OF TASKS

*Bar Chart*

*Line Graph*

## 2. RESPONSIBILITY ALLOCATION

### *i. Lixing*

- Write user stories for the customers.
- Implement functions and write tests for US2, US3, US4, US5 during Milestone 2.
- Write the Custom Burger part in home.html, fix bugs in functions participating in making order process.
- Edit the final Class Diagram relating to changes throughout the frontend development.

### *ii. Fanrui*

- Write user stories for the staffs.
- Implement functions and write tests for US1, US6, US11, US12 during Milestone 2.
- Write Order List and Stock parts in staff.html, fix bugs in functions participating in updating inventory.
- Edit the final user stories based on tutor feedbacks and group discussions.

### *iii. Dat*

- Combine and edit user stories, add user stories that are missing.
- Implement functions and write tests for US7, US8, US9, US10 during Milestone 2.
- Design the overall template of the front end, write Base Burger part in home.html and New Ingredient in staff.html.
- Generate the ER Model, velocity charts and the overall layout of the final report.

## 3. GROUP MEETINGS

### *i. 5 March – First Meeting*

- Form the new group.
- Complete the Epic Stories and User Stories of the actors: Customer, Staff - Service Orders and Staff - Inventory Stock.
- Complete the Acceptance Criteria of the actor Customer.

### *ii. 6 March – Complete Milestones 1*

- Improve the Epic Stories and User Stories.
- Complete the Acceptance Criteria of the actors: Staff - Service Orders and Staff - Inventory Stock.
- Decide the submitting time: Thursday, 7 March.

*iii. 12 March – Milestone 1 Presentation*

- Improve the User Stories and Acceptance Criteria.
- Make US9 into three different user stories.

*iv. 19 March – Milestone 2 Discussion*

- Classes and subclasses of the class diagram.
- Functions following the acceptance criteria.

*v. 26 March – Class Diagram Design*

- Changes in attributes and methods of the classes RestaurantSystem and Inventory.

*vi. 2 April – Class Diagram Demo*

- Remove class Staff and Log from the diagram.
- Every member works on different user stories.
- Lixing works on US2, US3, US4, US5.
- Fanrui works on US1, US6, US11, US12.
- Dat works on US7, US8, US9, US10.

*vii. 9 April – Working Software Demo*

- Improve the implementation of function regarding a making order process.
- Add some small tests for checking order errors based on tutor feedbacks.

*viii. 16 March – Front End Design*

- Agree on the overall layout of home.html and staff.html.
- Distribute tasks to each member based on sections in the html files.
- Lixing writes the Custom Burger section.
- Fenrui writes the Order List and Stock sections.
- Dat writes Base Burger and New Ingredient sections.

*ix. 23 March – Milestone 3 Presentation*

- Decide the structure of the final report and responsibility of each member.
- Lixing works on the Class Diagram.
- Fenrui works on the User Stories.
- Dat works on ER Model and velocity charts.
